Introduction

MOST WILL HAVE HEARD OF THE GAME CALLED JEOPARDY! WHICH JEOPARDY! IS AN AMERICAN TELEVISION GAME SHOW CREATED BY MERV GRIFFIN. THE SHOW FEATURES A QUIZ COMPETITION IN WHICH CONTESTANTS ARE PRESENTED WITH GENERAL KNOWLEDGE CLUES IN THE FORM OF ANSWERS, AND MUST PHRASE THEIR RESPONSES IN THE FORM OF QUESTIONS. IN MY VERSION, I CALL IT ASKABOUT. I WAS TRYING TO GO FOR A CATCHY NAME, BUT SIMILAR TO JEOPARDY PLAYERS ARE GIVEN A GAME TABLE OF DIFFERENT CATEGORIES AND DIFFERENT LEVELS OF DIFFICULTY. AS THEY ANSWER QUESTIONS THEY WILL BE AWARDED POINTS, AND WHEN THEY FINISH THE GAME THEY WILL BE RANKED ON HOW MANY POINTS THEY GOT. I BELIEVED THIS WAS A FUN GAME THAT USERS COULD TRY AND ANSWER QUESTIONS.

How AskAbout works

Objective of the game

The object of the game is to get as many points as possible by answering as many questions correct.

The Categories and questions are as follows

C++ Questions

- What primitive data type we are prohibited from using in Dr.Lehr's C++ class?
- TRUE or FALSE, according to Mark's Law it is better to always use the longest code possible.
- What type of variable can only be seen or accessed in a block of code, for example inside a function?

Movies Questions

- In the movie Toy Story, what actor plays the voice of sheriff Woody?
- Which block buster movie ends in tragedy when a ship attempts to voyage from England to New York?
- In The Lord of the Rings, Aragorn, one of the main protagonists, is also known by what name?

Animals Questions

- What animal in the horse family has white and black stripes?
- Which land animal can sprint up to 70 MPH in under 3 seconds?
- According to reputable institutions, which creature is the most venomous on planet Earth?

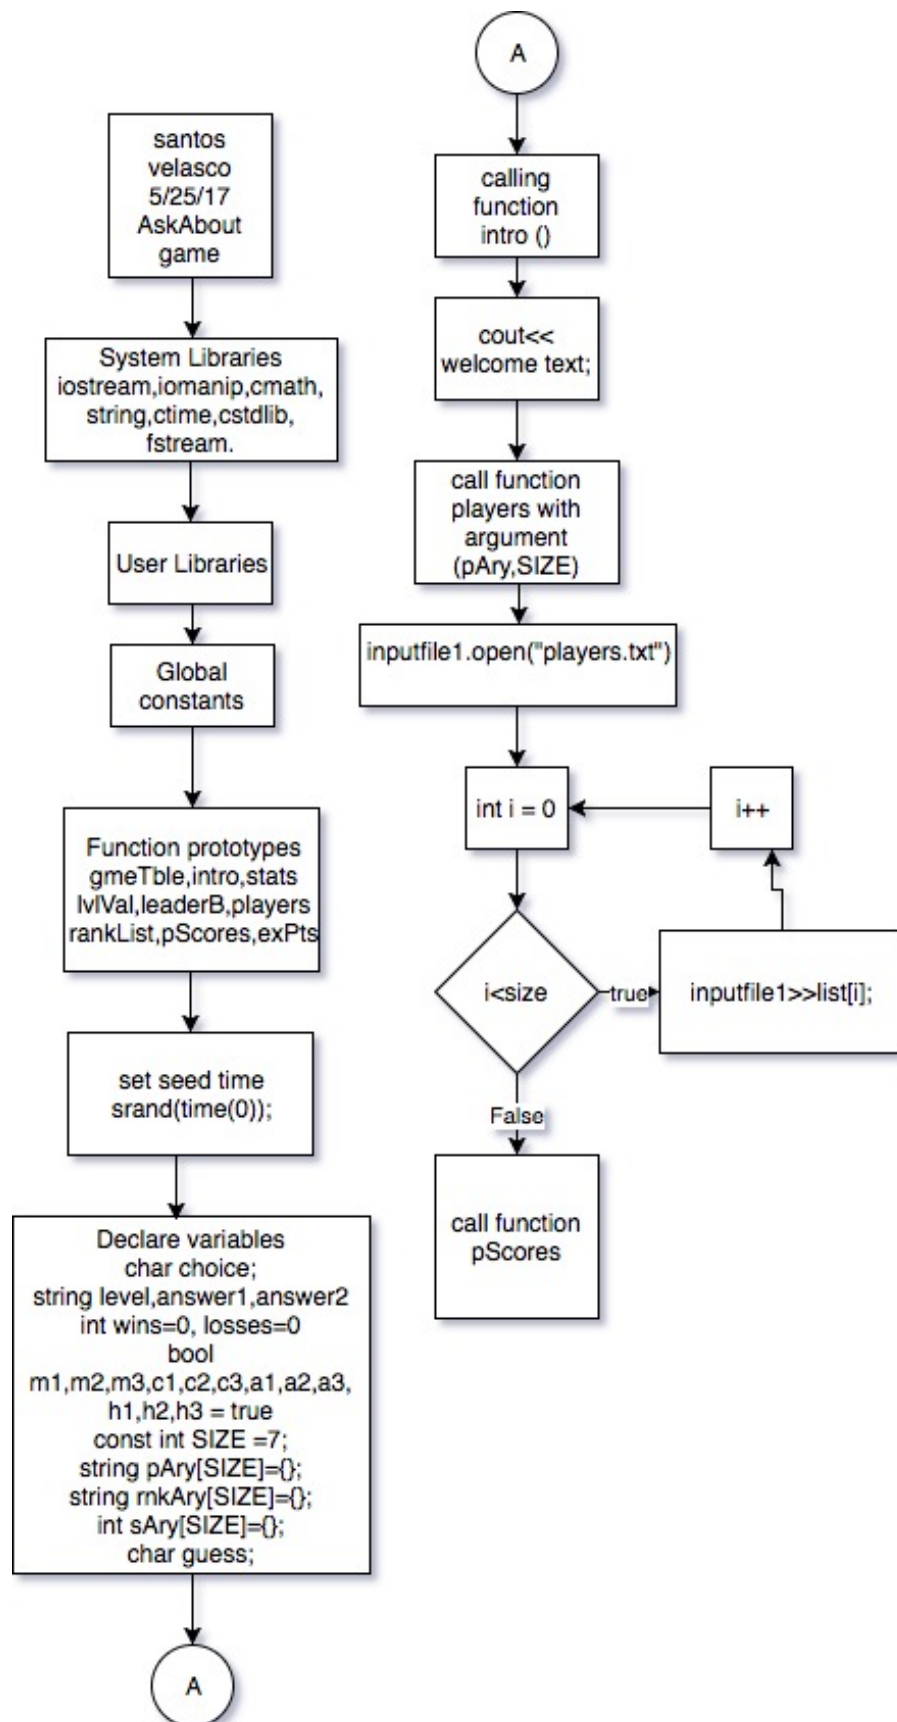

History Questions

- Who is commonly accredited with the invention of the light bulb?
- The Statue of Liberty was given to the United States by what country?
- The period after the Civil War, 1865-1877, was what Era?

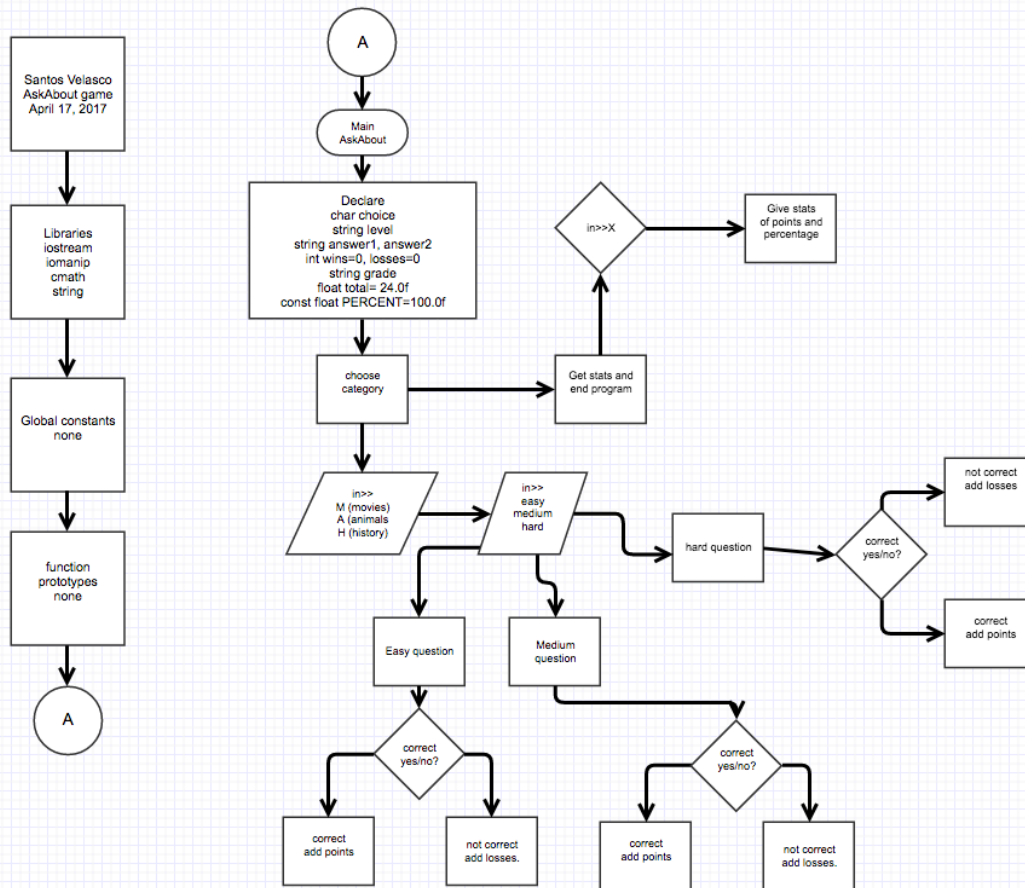

AS THE PLAYER GOES THROUGH EACH QUESTION THEY WILL BE GIVEN ONE TRY TO ANSWER THE QUESTION, AFTER THEY HAVE ATTEMPTED THEY WILL NOT BE ABLE TO ATTEMPT THE SAME QUESTION AGAIN. THE PLAYER WILL EITHER ACCUMULATE POINTS OR LOSSES, STATISTICS WILL BE GIVEN AT THE END OF THE GAME SHOWING WHO CAME IN WHICH RANKING.

ONE ADDITION THAT I HAVE MADE TO THE GAME IS THE GUESS CHALLENGE. THE PLAYER WILL HAVE TO GUESS A NUMBER FROM 1-50 AND IF THEY GET A NUMBER RIGHT THEY ARE AWARDED 25 POINTS, WHICH CAN BOOST THEM TO FIRST PLACE.

Logic of the Game (Flowchart)

AskAbout

Proof of working project

```
Project_2 (Build, Run) x Project_2 (Run) x
-----
Welcome to AskAbout!
-----
Similar to Jeopardy, AskAbout displays a category in each column.
In each category there are 3 questions which are rated easy,
Medium, or hard. Object of game is to answer as many questions
correct.Points will be added accordingly, for each question you
answer correctly and for each question you get wrong. have fun!
-----

These Players have already played:
-Jimmy
-Charles
-Samantha
-Tyler
-Gwen
-Charlotte

You're up next, whats your name? 
```

```
-----
To choose a category, enter the character according to the column
For level of difficulty enter 'easy', 'medium', or 'hard'

      (C)      (M)      (A)      (H)
=====
|  C++  |  MOVIES  |  ANIMALS  |  HISTORY  |
|=====|
|  Easy  |   Easy   |   Easy    |   Easy    |
|=====|
|  Medium|   Medium |   Medium  |   Medium  |
|=====|
|   Hard |   Hard   |   Hard    |   Hard    |
|=====|
*Enter X to exit game

Enter a category: C
Difficulty level: hard
What type of variable can only be seen or accessed in a block of code, for example inside a function? static local
Thats true. awarded 5 points
Enter a category: x

Your Statistics
-----
Points: 5
Losses: 0
Total points possible: 32
Percentage out of total possible: 15.6%
You need to start reading some books!

RANK   POINTS   NAME
-----
1st    32       Gwen
2nd    30       Samantha
3rd    25       Charles
4th    18       Tyler
5th    15       Charlotte
6th    11       Jimmy
7th     5       Santos

Want a chance to earn Bonus points?(Y or N) N
Ok, thanks for playing!

RUN FINISHED; exit value 0; real time: 32s; user: 0ms; system: 0ms
